

FIGURE 1

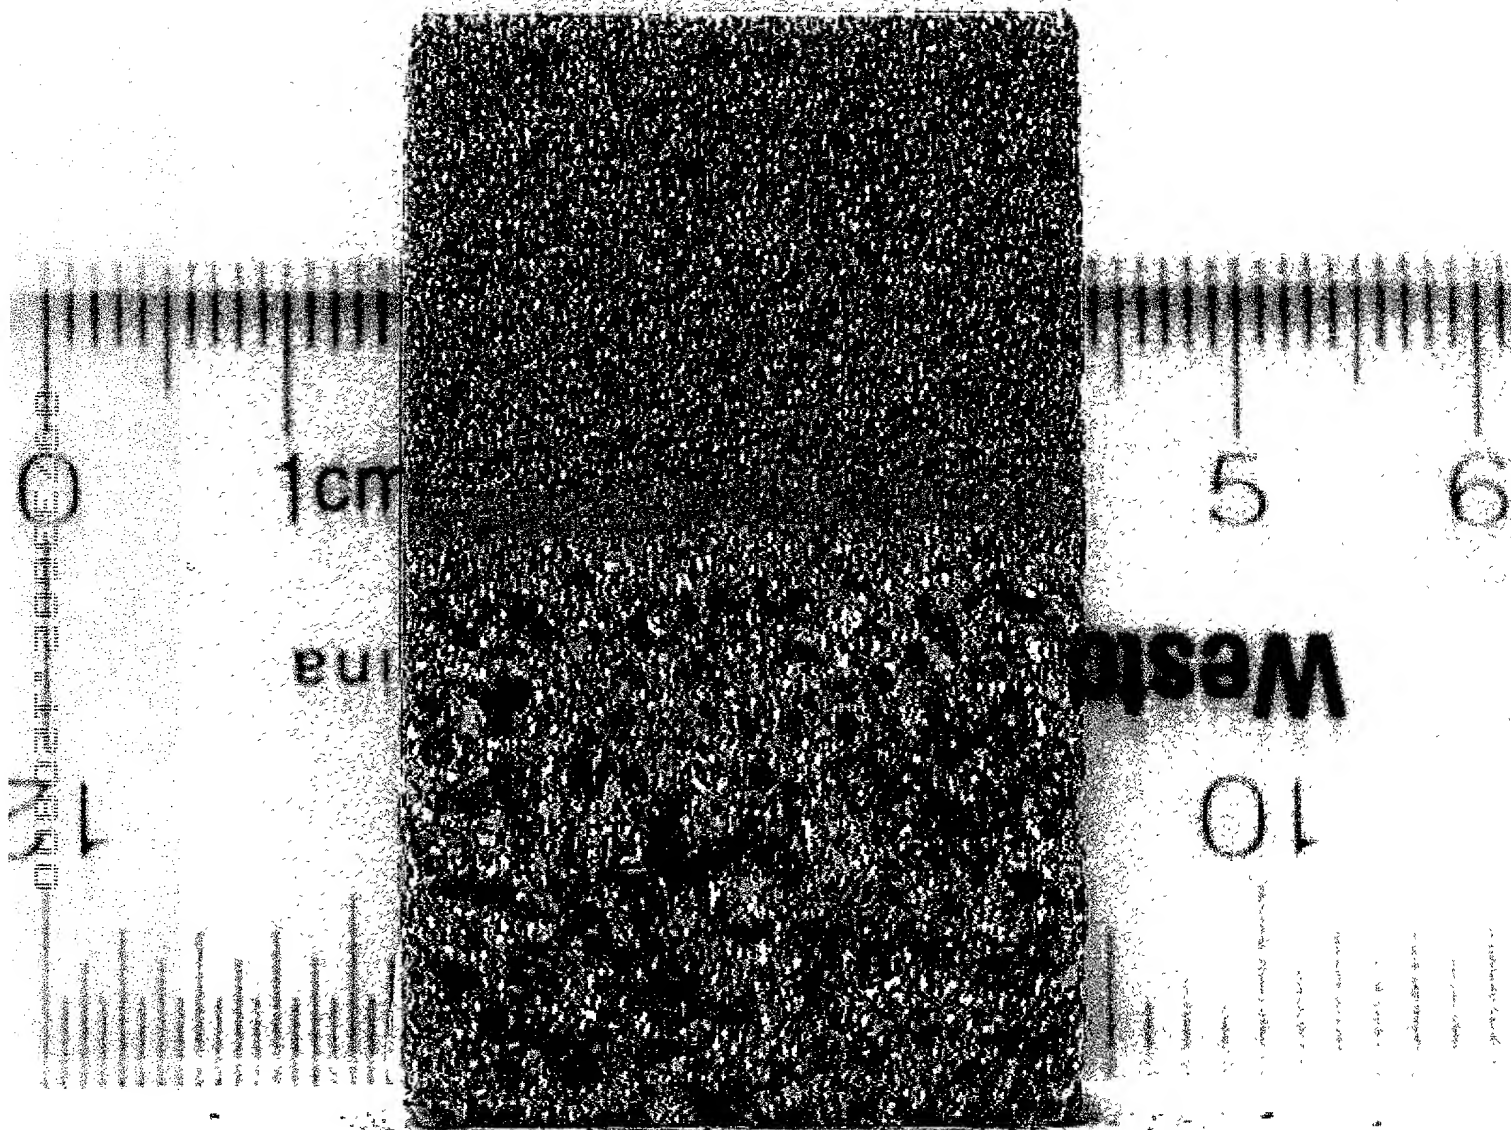

FIGURE 2

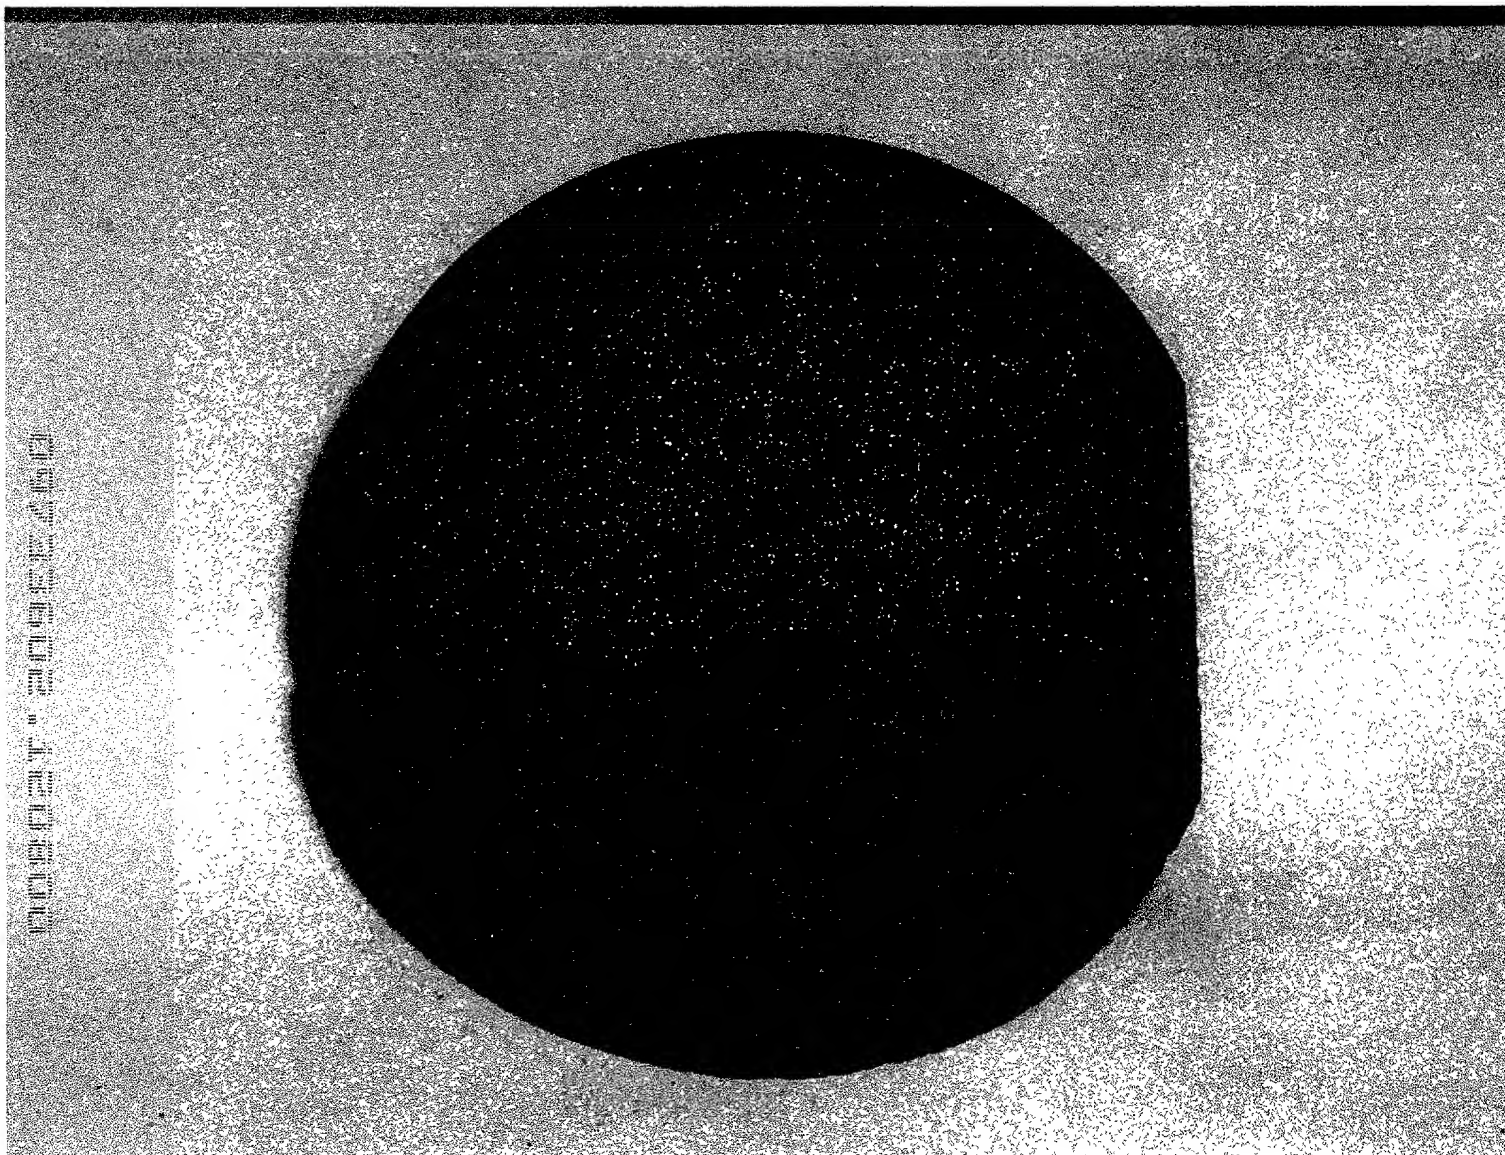

Figure 3

A circular, high-contrast, black and white image showing a dense, granular texture. The surface appears to be covered in a fine, irregular pattern of dark and light spots, giving it a rough, pebbled, or crystalline appearance. The lighting is somewhat uneven, with the right side of the circle appearing slightly darker than the left, creating a sense of depth and highlighting the texture. The overall effect is reminiscent of a microscopic view of a material or a close-up of a rough surface.
